

What every  user  
should know about

Visual Studio Code

How do **you** GitHub?

"It's so easy  
to forget about  
issues"

"I want to see who's  
added issues and  
assigned them to me  
without checking  
email or Slack"

"I lose track  
of PRs I've  
been asked to  
review"

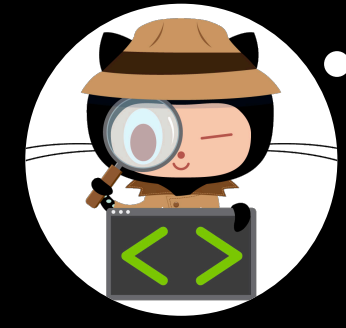

"I usually just glance  
at the code during a  
code review, if it was  
easier to check out  
the PR branch, I  
would"

"I like having  
as much as I  
can co-located  
in one place"

"We struggle  
with  
participation  
in code  
reviews"
